

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. SECOND BIENNIAL REPORT

OF THE

Trustees, Superintendent and Treasurer

OF THE

ILLINOIS WESTERN HOSPITAL FOR THE INSANE

AT WATERTOWN.

JULY 1, 1900.

SPRINGFIELD, ILL.:
PHILLIPS BROS., STATE PRINTERS,
1900.

OFFICERS OF THE HOSPITAL

BOARD OF TRUSTEES.

President,

FRANK W. GOULD, Moline.

Trustees,

FRANK W. GOULD, Moline.

ALLAN M. CLEMENT, Chicago.

J. I. McCAWLEY, Clay City.

Treasurer,

C. F. LYNDE, Rock Island.

RESIDENT OFFICERS.

Medical Superintendent,

WARREN E. TAYLOR, M. D.

Chief Clerk,

JOHN W. PARKER.

REPORT OF THE TRUSTEES.

HON. JOHN R. TANNER, *Governor of Illinois.*

SIR:—We have the honor to submit herewith the second biennial report of the trustees, superintendent, and treasurer of the Illinois Western Hospital for the Insane. Two years ago the institution had been open for patients but six weeks and this, therefore, is the first complete report we have had occasion or opportunity to make. At that time the buildings were insufficient and incomplete, and were surrounded by grounds whose naturally unfavorable character was increased by the disorder attendant upon building operations. There was room for but 360 patients; we had an inadequate lighting and heating plant, without reserve power for emergencies; we had neither store nor barns, save of the most primitive and temporary nature, and there were no roads nor walks, it then being almost impossible to approach the building in wet weather.

It is with a sense of pride which can but be deemed justifiable that we view the condition surrounding the entire institution at the present time. The new wards have been for some time completed and occupied, there now being over 600 patients in the institution; a store and cold storage building has been constructed and fully equipped; an additional boiler, engine and dynamo have been installed; two barns and various smaller farm buildings have been erected; a good road has been built to the hospital; cement walks have been laid around the buildings, and a good beginning made towards bringing the grounds to the same degree of beauty which is so marked in other institutions of Illinois. It must be self-evident that the accomplishment of these improvements has involved a vast amount of work, the details of which appear in the report of the superintendent.

The statistics bearing upon the medical department of the hospital can be but satisfactory, indicating as they do 169 patients discharged as recovered, out of a total of 878, of which number 554 were old cases, having been transferred from other institutions.

The same careful economy which marked the completion and furnishing of our buildings has prevailed during the two years in which our hospital has been in actual operation, and despite the small size of our institution our per capita cost has at all times compared favorably with that of the older and larger insane hospitals of the country.

Because of the strong advance in all building materials it was not thought best to immediately undertake the construction of an infirmary with the \$20,000.00 granted by the last General Assembly for that purpose and work was deferred until this summer. The structure is now well under way and will soon afford accomodations for 40 invalid patients.

After a careful consideration of the needs of the institution, and the disadvantages under which it labors, we heartily approve of the recommendations for ordinary expenses and improvements by the superintendent, and urgently request the following appropriations by the next General Assembly:

For ordinary expenses for year beginning July 1, 1901.....	\$66,000 00
ordinary expenses for year beginning July 1, 1902.....	91,000 00
society hall.....	12,500 00
male dormitory and furnishing the same.....	5,500 00
laundry building.....	2,500 00
parole ward and furnishing the same.....	6,000 00
grounds, including grading, rip-rapping, walks, roads, bridges, etc.....	10,000 00
refrigerating plant.....	2,500 00
iron fence.....	1,500 00
farm fences, per annum.....	1,000 00
library	250 00
repairs and improvements	2,500 00

All of which is very respectfully submitted,

F. W. GOULD, *President.*

ALLAN M. CLEMENT,

J. I. McCRAWLEY,

Trustees.

WATERTOWN, *Illinois*, August 20, 1900.

REPORT OF THE SUPERINTENDENT.

To the Board of Trustees:

In compliance with the law, I beg to submit to you the second biennial report of the management and operation of this institution, together with an estimate of its additional needs.

By referring to the following tabulated statements you will see that at the beginning of the present term, July 1, 1898, we had 354 patients, most of whom were received from other institutions during the previous month of May. Since then we have received 208 patients from other institutions and 316 direct from county authorities. During the two years 76 patients have died, a majority being old, decrepit, chronic cases. We have on parole 28 patients and have discharged 169, leaving in the institution on the 1st day of July, 1900, 620 patients. During the two years the general health of the patients has been good. We have had no contagious diseases and the patients have been absolutely free of typhoid and malarial fevers, which I think is due to the purity of our water and healthy surroundings.

With the aid of patients, and at little expense to the institution, we have done the following work:

Moved 21,000 cubic yards of earth in making fills around the building.

Made 1,100 feet of rock gutter.

Made $\frac{1}{2}$ mile of gravel road, hauling 831 loads of gravel one mile for the same.

Laid 650 feet of sewer pipe and 4,500 feet of drain tile from the buildings.

Laid 4,000 square feet cement walk.

Set 400 feet stone curbing.

Laid 17,000 square feet of sod.

Excavated infirmary basement, 1,500 yards.

Excavated store basement, 600 yards.

Excavated two root cellars, 1,200 yards.

Made one-half mile of dirt and cinder road.

Grubbed and trimmed thirty acres for proposed park.

Set structural iron for infirmary now under construction.

In addition to the foregoing we have had 10,000 cubic yards of earth moved, and 10,000 square feet of cement walk laid by contract. This work, together with all the other materials and the tools used on the grounds being paid for from our appropriation for roads and walks.

A feature of the hospital combining economy and convenience is our machine shop, located in the north-east basement and equipped with an engine lathe, wood-working lathe, band saw, circular saw, emery grinder and grind stone, all operated by electric power.

Electric motors have been installed for supplying power for the laundry, kitchen, elevators and ventilating fans.

In the south-east basement we have made a comfortable and attractive dining-room for the outside employés, a sewing room and a mending room. These rooms are all large, airy and well lighted and excellently adapted for their purposes.

With the appropriation of \$3,500 granted us we have erected a two story pressed brick store and cold storage building. The first floor contains the store proper and three cooling rooms. On the second floor is the reserve stock of supplies and the ice chamber holding seventy tons. The interior of the building is finished in oiled southern pine, and is well arranged for the convenient handling and compact storing of merchandise. In our cooling rooms we easily maintain a regular temperature of 33 degrees.

At the rear of the power-house a carriage barn has been built of pressed brick and stone, with a slate roof. The structure is very pleasing in appearance and is well arranged within, having a cement washing-floor, box stalls, electric light and heat, and sleeping quarters for coachman.

To the farm many improvements have been added, the most important of which is a large frame barn, with a capacity for our present stock of horses and cows. The section intended for the cattle was arranged with a view of cleanliness, has movable stall partitions and a cement floor, permitting us to thoroughly flush it twice each day. There have also been built a large and well arranged pig house and chicken house, and a barn for farm implements. The water supply for all these buildings is drawn from a well by gasoline engine, which is placed in a detached building. The farm needs considerable fencing, and in order to make it more productive will need fertilization and considerable drainage.

Upon the hill, and convenient to the main building, we have built a root cellar large enough for the storage of all our products. This has double hollow walls, double windows, and during the extreme cold of last winter served its purpose admirably.

I beg to recommend the following appropriations:

Ordinary Expenses.—We now have 620 patients and with the completion of our infirmary our capacity will be increased by 40. The demands for space in the institution are constant, and it is to be expected that we will average 650 patients during the ensuing two years. For this number we ask an ordinary expense appropriation of \$140.00 per capita, or \$91,000.00, per annum.

From the appropriation for the first of the two years, however, we believe that \$25,000.00 of our present surplus should be deducted, leaving the amount for the first year \$66,000.00, and for the second year \$91,000.00.

Society Hall.—At the present time the only place in which entertainments or religious services can be held is the first floor of the female employés dormitory, which is inadequate and illly adapted to the purpose. It is necessary that some better provision should be made, for the sake of both patients and employés. Situated as we are, remote from any place of amusement, it is our duty to afford ample means of entertainment and diversion for all.

Male Dormitory.—The sleeping accommodations for the male employés are insufficient, undesirable and so located that sleep in the daytime is almost an impossibility. The rooms are not suitable for the purpose and were utilized only as a temporary arrangement until proper provision should be made. I would urge the erection of a detached dormitory for the male employés, there already being a suitable building for the women.

Laundry.—When the hospital was equipped, the only place for the laundry was the south-west basement. The unpleasant features of a laundry in the basement, under a ward, can but be apparent. The heat is intense, ventilation is necessarily poor, more or less odor rises, and when the drying-room of the laundry recently burned, the necessity of a change impressed itself upon us. A separate building should be erected to which our present machinery could be removed and more advantageously arranged.

Parole Ward.—A large number of patients whose mental condition is such that they are allowed full liberty during the day are obliged to sleep upon the regular wards, and during the inclement weather, to spend the days there. This not only works an injury to them, but involves a sacrifice of room which might be devoted to acute cases, were some other provision made for the parole patients. I would earnestly urge the erection of a detached two story building, the first floor to be used as a smoking and reading room and the second as sleeping quarters.

Grounds.—While much has been done towards the improvement of the grounds, there remains even a larger amount yet to be accomplished. When it is considered that a large part of the tract upon the hospital hill was in almost a primeval condition, that the surface is extremely irregular, being broken by several ravines, and that less than two years ago the building operations on the main structure were completed leaving a vast quantity of debris to be removed, the necessity for a large amount of work involving the liberal appropriation and expenditure of money will be apparent. Several acres have been partly cleared, but a park for the patients should be laid out, roads and walks throughout the State's property should be built, sumner houses, and several bridges crossing ravines should be constructed and all the surroundings should be improved and beautified. For this purpose \$10,000.00 will be no more than sufficient.

Refrigerating Plant.—Notwithstanding our proximity to the Mississippi river we have had great difficulty in obtaining a sufficient supply of ice without paying an exorbitant price for the same, the entire local crop having been sold to a St. Louis firm. The two years previous we paid but 60 cents per ton while this year the price asked was \$2.00 per ton. We were able to get part of our supply for \$1.00, but in view of the probable difficulty in the future, I deem it wise to install a refrigerating and ice-making plant sufficient for our needs. This would not only effect an economy in the first cost but would save handling an immense amount of ice, which is an important consideration as most of our supply had to be hauled a distance of two miles. For this purpose we ask an appropriation of \$2,500.00.

Fencing.—But a small part of the grounds on the hill are fenced and the farm is also lacking in this particular. A stone and iron fence should be built across the front of the hospital site, costing about \$1,500.00. To this should be added about \$1,000.00 per annum for the other necessary work in this line.

Library.—For the purchase of books and periodicals \$250.00 per annum is desired.

Repairs and Improvements.—For this purpose, \$2,500.00 per annum, or about 1 per cent of the cost of the main buildings will be sufficient.

Very respectfully, your obedient servant,

W. E. TAYLOR,

Superintendent.

WATERTOWN, *Illinois*, August 20, 1900.

STATISTICAL TABLES.

ACCOMPANYING THE MEDICAL SUPERINTENDENT'S REPORT.
